## LANGUAGES

**SPANISH** *native proficiency*  
**ENGLISH** *basic professional proficiency*

## SKILLS

### Front-end

**Lenguajes:** HTML, CSS, JavaScript ES6+ (with Lodash, Gulp, Grunt, Webpack, ReactJS, Redux, AngularJS, Jest, Mocha, Enzyme, Chai, Sinon, among others libraries y frameworks).  
**Techniques:** Mobile First, Grid System, Web Accesibility.

### Back-end

Node.JS (with Express.JS, Restify, MicroJS, among others frameworks), NoSQL (MongoDB), Objective-C, PHP, MySQL.  
**Additionally:** I have basic knowledge of .NET, Java and Swift (experience less than 1 year) and I've worked with cloud services like: Google Cloud Platform, Firebase, Cloudflare, On-premise VPS and AWS S3. Also tools like: Docker, Kubernetes and Jenkins.

### Design patterns

MV\*, Observer, Constructor, Prototype, Singleton, Factory, Modular (AMD, CommonJS), mainly.

### Others developments skills

RESTful, test-driven development, behavior-driven development, agile methodologies (SCRUM and KANBAN).

## ABOUT

I'm focused on building beautiful interfaces and experiences for customers. Currently work as Front-end software developer at Globant from Santiago, Chile. Also I'm an amateur photographer, a enthusiast community builder and volunteer for non-profit organizations.

I have more than 6 years of experience. In recent years I've worked with technologies such as: JavaScript, NodeJS, mobile development (native and hybrid for iOS), databases SQL and NoSQL and different JavaScript libraries and frameworks like: AngularJS, ReactJS, BackboneJS, ExpressJS, Restify, among others.

Also, in last years I've worked in agile methodologies, proud of be part of excellence teams where I'm outstanding by my commitment, lidership, focus in objectives and global vision.

I like challenging me every time, based on this, on my career I've have different experiences with differrent industries: digital marketing, private and public events with high concurrency (online video and audio streaming) and recently in airline industry.

## ACHIVEMENTS

 **2016 - 2017**

In 2016 awarded by Globant value: "Constantly Innovate", same year in which I was elected Ambassador in Chile for "Globant Labs", the innovation center of Globant.

In 2017 awarded by Globant value: "Think Big", same year that I started to lead initiatives with the communities of developers (internal and external) adding to the presence on the Globant map in Chile and the integration of Globers in this constantly growing location. Also, I was recognized by the company as "Most value Player".

## WORK EXPERIENCE

 **2015 - currently**

**SENIOR FRONT-END DEVELOPER**  
Globant

Contractor in LATAM Airlines Group. Development of web applications, in charge of the Front-end experiences through different roles (developer, champion architect and recently as tech-lead).

Currently I'm work as tech lead for Digital Analytics Team, who working on implementation of an internal project of big-data analytics.

Ambassador of innovation projects from Chile (Globant Labs) and champion of front-end internal community.

 **2014 - 2015**

**SEMI SENIOR FULL STACK DEVELOPER**  
Mediastream

Front-end Development and Back-end of the different products related to high demand audio and video streaming (OvP, OTT, WebChannels, among others).

Cooperation with the management and organization of events in Chile, Brazil and Colombia. Maintenance and development of mobile applications for iOS (native).

 **2010 - 2014**

**STARTUPS CO-FOUNDER**  
Maxis

**First round:** Foundation and c-level of the board. In it I built, together with a great team, what would be the first product of success in my history as an entrepreneur. The previous thing involved a series of experiences, travel, analysis, research, creation, re-invention and meetings with "possible clients and investors" , Which gave me a great field experience for the creation of products.

**Second round:** Foundation and management. In it was achieved the staging of a product (mobile app: "descubri") which, after being presented to the community, got a private investment of 8,000 USD, in addition to multiple recognitions by the Government of Chile (SERCOTEC and "Imagina Chile").

## EDUCATION

 **2010 - 2014**

**PROGRAMMER ANALYST**  
Technical training center: INACAP

Middle technical degree of computer science engineering. I've decided not continue studies of computer science because I'm more autodidact learner and I think my experience working in software development overcome the kwnoledge I can get from universities in my country, but I never stop learn.

 **2015 - currently**

**LATEST CERTIFICATIONS**

- Google Analytics Individual Qualification
- Google Maps: Developer Credential
- Scrum Developer Certified (SDC)
