ABOUT

I'm a Software Engineer centered on producing beautiful interfaces and experiences for consumers. Currently working as Technical Leader and Software Architect at Globant in Santiago, Chile. I'm also an amateur photographer, a community builder enthusiast and volunteer for non-profit organizations.

I have more than 8 years of work experience working in different industries such as digital marketing, e-commerce, streaming (video and audio) for high concurrency users and recently the airline industry.

Also, in the latest years I've worked in agile methodologies, proud of being a member of excellence teams where I'm outstanding for my commitment, leadership, focus on objectives and global vision through different roles and technologies.

ACHIEVEMENTS   2016 - 2019

In 2018 and 2019 I received the Globant award: "Most rewarded Glober", internally know as "Glober of the year". This award identifies the most recognized employee in "StarMeUp" (www.starmeup.com) by other colleagues.

In 2017 I received the Globant award: "Think Big" and in that same year, I started to lead initiatives with the communities of developers, adding to the presence of the Globant map in Chile and the integration of Globers in this constantly-growing location. I was also recognized by the company as "Most Valuable Player".

In 2016 I was given the "Constantly Innovative" award by Globant, in that same year, I was elected Ambassador in Chile for "Globant Labs", the innovation center of Globant.

SKILLS

Programming languages
Proficient with: JavaScript, PHP (7 Years).
Familiar with: Python, Java, Objective-C, Swift, .NET

Libraries / Platforms
Node.JS, Express.JS, Restify, Socket.io, Mongoose, Lodash, Moment.JS, D3.js, Gulp, Grunt, Webpack, ReactJS, React Native, Ionic, Redux, Angular.JS, Jest, Mocha, Enzyme, Chai, Sinon, jQuery, Google Maps Platform (certified), serverless.

Markup / Templating
HTML, CSS, Sass, Less, Jade, Mustache, Bootstrap.

Data / Databases
Proficient with: MySQL (7 Years), MongoDB (3 Years), Google Analytics and Google Tag Manager (certified).
Familiar with: SQL Server, Elasticsearch, Google Bigquery, Machine Learning.

DevOps / Infrastructure
Proficient with: Docker, Jenkins, CI/CD, (micro-)service oriented architecture.
Familiar with: Kubernetes, Amazon Web Services, Cloudflare, On-premise VPS, Google Cloud Platform.

Other software development skills
Unix/Linux, Functional programming, RESTful APIs Development, Test-driven development, Behavior-driven development, Accessibility (W3C Standard), Agile methodologies (Scrum Developer Certified - SDC).

EDUCATION

Technical degree of computer science
I decided no to continue with my computer science studies because I'm more of an autodidact and I think my experience working in software development exceeds the knowledge I could have gotten from my country's universities. However, I never stop reading and learning on my own.

Languages
English: advanced professional proficiency.
Spanish: native proficiency.
